NEW PRODUCT

SUREBOND SB-190 Everseal

Versatile, hard-setting, high-strength adhesive sealant. Superb tensile strength with high impact resistance. Water and weather proof.

- The strongest adhesive sealant with 2,000 PSI
- Hard setting when fully cured creates a pick proof seal
- Remains flexible with elongation up to 500%
- High impact resistance prevents against cracking and shearing
- Bonds to virtually any surface including plastic, metal, cement, brick, fiberglass, vinyl, glass, wood and painted surfaces
- Cure Time: 24-28 Hours
- Color: **CLEAR**
- 10.3 fl. oz.

Cat. No. 61580

PICK PROOF

SUREBOND SB-188 High Temperature Silicone Sealant

Non-flammable, fast curing, high solids silicone sealant. Insulates electrically and thermally. Water and weather proof.

- Functional temperature range of -75°F to 500°F (intermittent to 650°F) ideal for HVAC applications
- High flexibility allows for movement of dissimilar surfaces within functional temperature range
- Application range of -40°F to 200°F allows for year-round use
- Unaffected by sunlight, heat or cold
- 24 hour cure time leads to faster project completion
- Color: **RED**
- 10.3 fl. oz.

Cat. No. 61582

RED
Color Used for High Temperature Marker

SUREBOND SB-12 Metal Sealant

High-strength, heavy-duty sealant for all types of metals. Maintains bond in wet and moist conditions.

- 1,200 PSI forms long-lasting, water resistant bonds
- Functional temperature range of subzero to 170°F
- Superior gunning and tooling allows for quicker and easier application
- 24 hour cure time leads to faster project completion
- Bonds to all types of metal including steel, aluminum, painted metals, galvanized metal
- Color: **ALUMINUM GRAY**
- 11 fl. oz.

Cat. No. 61581
