NEW PRODUCT

HydroClean® Fill Valve with Cleaning Tube

- Patented Mini-Valve™ Lets you Adjust the Amount of Water Directed to the Bowl and Can Save Over 3,000 Gallons of Water each Year Caused by Overfilling the Bowl.
- Patented Float Lock™ Allows you to Make Minor Repairs in the Tank without Shutting off the Water. Easily Check for Flapper Leaks by Engaging the Float Lock to Check the Tank Level. Turbujets Make a Distinctive Sound Signaling a Leaking Flapper.
- Patented TurbuJet™ Technology engages Powerful Jets of Water to Lift Rust and Sediment from the Tank Bottom and Flushes them Down the Drain, Keeping the Tank Clean and Preventing Slime Buildup on the Flapper.
- Positive Locking Allows you to Make Height Adjustments with a Simple 1/4 Turn, without Needing to Remove the Valve from the Tank.
- Exclusive Click Tight Nut™ Locks Valve into Place without a Wrench.
- Controlled Shut-Off Eliminates or Significantly Reduces Water Hammer.
- OEM Ref. No. HC660
- Case Qty. 24
