GATORSKIN™

PREMIUM PRODUCT

The Exclusive Rubber Line

Guaranteed to Last,

Even Under the Harshesht Conditions

**THE *TOUGHEST*
SKIN IN THE BUSINESS**

THE **TOUGHEST** SKIN IN THE BUSINESS

GATORSKIN™ Premium Products are the result of requests from you, our customers, for rubber goods that would hold up in the harshest water conditions.

Recent trends show that more municipalities are using chloramines and other chemicals in the treatment of their public water. Combine this with the harmful chemicals found in many of today's cleaners and you find the need for **GATORSKIN™ Premium Products**.

Chloramines and other harsh chemicals attack the rubber compound found in many of today's popular plumbing products, such as flappers, tank balls and bibb washers. This causes a deterioration process that leads to annoying call-backs due to leaks.

GATORSKIN™ Premium Products are treated with a special antioxidant designed to repel chloramines and other harmful chemicals, thus slowing down the deterioration process. This is why **GATORSKIN™ Premium Products** have become the first choice of professional plumbers and maintenance engineers across the country.
