PRESS STOPS

QUARTER-TURN CERAMIC DISC PRESS STOPS

Wolverine Brass® Ceramic Disc Quarter Turn Press Stops are the only press-to-connect water valves designed with a replaceable ceramic disc cartridge. The built-in 1/2-inch press connection allows for secure installs in less time and without soldering. If the valve ever needs servicing for a leak, drop in a new cartridge. There's no need to cut out the entire stop or replace any piping.

FROST-PROOF LAWN FAUCETS

The Wolverine Brass ProSeries lawn faucets with metal handle are designed for long-term performance and durability in any residential setting. The frost-proof design gives homeowners a lawn faucet that resists freezing without the added maintenance of an annual turnoff or flush out. Easy to install with new press and PEX connections and seat housing marked for quick spout alignment. Models available with and without a vacuum breaker. Available for customization.
